Software Development | Systems Analysis

EDUCATION

California State University, Los Angeles | Bachelor of Science in Computer Information Systems | May 2026

Relevant Coursework: Web Design & Development, Advanced Information Systems Development, Business Intelligence and Data Warehouse, Software & Hardware Architecture, Systems Analysis and Design, Systems and Network Admin

RELEVANT PROJECTS

Systems Analysis & Business Process Capstone | Delta Air Lines – KRONOS | 01/2026 – 05/2026

- Designed a passenger disruption-recovery decision-support system for Delta Air Lines (KRONOS), modeling rebooking, refund, voucher, and escalation workflows through UML diagrams, business process models, and user-centered recovery dashboards.
- Conducted SWOT analysis and business process analysis to identify operational recovery challenges, translating findings into requirements for the KRONOS decision-support system.
- Created system component documentation using Unified Modeling Language (UML) including Use case Diagrams, Use case descriptions, activity diagrams, class diagrams, sequence diagrams, state machine diagrams.

GIS-Based Wildfire Evacuation Accessibility Analysis | ArcGIS Pro

- Integrated and analyzed large geospatial datasets, including wildfire hazard zones, census demographics, transportation networks, and shelter locations, using ArcGIS Pro.
- Built transportation network models and performed service-area analysis to identify evacuation accessibility gaps and evaluate travel-time constraints across California.
- Developed and tested scenario-based solutions by modeling proposed safe zones, generating data visualizations, and presenting findings through maps and analytical reports.

AWS Cloud Infrastructure & Web Server Deployment | Amazon Web Services (AWS)

- Designed and deployed a cloud-based web server environment using AWS services, including VPC, EC2, Internet Gateway, security groups, IAM, and CloudWatch.

Emotional Support Animals Website

- Developed a responsive informational website using HTML, CSS, and Bootstrap, applying accessibility, semantic HTML, SEO, and AI-assisted content development principles.

EXPERIENCE

Independent IT Support & Systems Experience | 06/2020 – Present

- Built and upgraded desktop systems for gaming and productivity use, selecting compatible hardware components and optimizing system performance.
- Diagnosed and resolved hardware issues involving power supplies, storage devices, memory, and system stability.
- Improved legacy system performance through SSD and memory upgrades, reducing boot times and increasing overall responsiveness.
- Performed BIOS/UEFI updates, firmware recovery, and system troubleshooting to address compatibility and reliability issues.
- Provided technical guidance on component selection, system upgrades, and cost-performance tradeoffs.

SKILLS

- **Web Development:** HTML5, CSS3, JavaScript, Bootstrap 5, Responsive Web Design:
- **Development Tools:** Git & GitHub, Visual Studio Code, Figma, Lucidchart, ChatGPT, Claude, Claude Code, AI-Assisted Research & Prototyping
- **Systems & Analysis:** UML Diagrams, Business Process Analysis, Systems Analysis & Design, Requirements Gathering
- **Data & GIS:** SQL, Database Concepts, ArcGIS Pro, Network Analysis, Data Visualization
- **Programming Background:** Familiar with Java, Python, C, and C++ through academic coursework and projects
- **Additional Skills:** Technical Documentation, Debugging, User-Centered Design, Problem Solving
- **Languages:** English, Spanish

TRAINING AND CERTIFICATIONS

- CS50: Introduction to Computer Science (Harvard) (06/2024)
- Figma Essential Training - LinkedIn Learning (01/2025)
- Prompt Engineering with ChatGPT - LinkedIn Learning (01/2025)
- AWS Academy Graduate - Data Center Technician - Amazon Web Services (AWS) (05/2026)
- AWS Academy Graduate - Cloud Architecting - Amazon Web Services (AWS) (05/2026)
