Software Development | Systems Analysis

EDUCATION

California State University, Los Angeles | Bachelor of Science in Computer Information Systems | Graduated May 2026

Relevant Coursework: Web Design & Development, Advanced Information Systems Development, Business Intelligence and Data Warehouse, Software & Hardware Architecture, Systems Analysis and Design, Systems and Network Admin

EXPERIENCE

Technical Product Lead Intern | HERS365 | 08/2026 – Present

- Help lead a 5-person development team building and launching a sports-tech platform for young athletes, setting priorities, tracking progress, and clearing blockers to keep the team on track for launch.
- Use Claude Code daily on the team's live codebase to speed up code review, troubleshooting, and documentation, reviewing AI-generated work for accuracy before it ships.
- Review and approve the team's code changes in GitHub with merge authority, testing updates and giving clear feedback that keeps development moving.
- Partner with developers and designers to turn product requirements into clear next steps, catching product and user-safety gaps on a platform used by minors.

AI Evaluation Fellow | Handshake AI Fellowship | Contract, Remote | 05/2026 – Present

- Evaluate AI-generated images through head-to-head comparison tasks, assessing instruction following, visual quality, realism, coherence, and the presence of AI-generated artifacts.
- Apply detailed evaluation rubrics to compare model outputs, select the stronger response, and provide concise evidence-based justifications.
- Review text-to-image and image-editing outputs for prompt adherence, preservation of requested content, identity consistency, and unintended visual changes.

PROJECTS

AI Company Atlas | LLM-Assisted Product Design & Development | [Live Site](#) | [View Case Study](#)

- Planned and designed an interactive AI industry intelligence platform for exploring companies, founders, investors, sectors, funding activity, and technical traction.
- Defined product requirements, user flows, visual direction, feature priorities, and data relationships before directing implementation through Claude Design and Claude Code.
- Designed six connected product experiences covering company discovery, relationship visualization, shortest-path exploration, company comparison, sector browsing, and technical-traction analysis, then validated implementation through feature testing.
- Guided application development and deployment using Next.js, TypeScript, Supabase, D3 Force, GitHub API, Hugging Face API, and Vercel, troubleshooting issues and refining the product through iterative testing.
- Created LLM-powered agents for production-readiness and SEO audits, prioritized findings, validated fixes, and prepared the application for deployment.

AURELION X1 Concept Car | AI-Assisted 3D Web Development | [Live Site](#) | [View Case Study](#)

- Designed and shipped an interactive 3D concept-car website end-to-end, from initial idea to a live, deployed product, built with AI-assisted development (Claude Code).
- Created an immersive experience where visitors explore the car in 3D, customize its appearance in real time, and view guided highlights of its design and features.
- Hardened the site for real-world use with fallbacks for older devices, accessibility support, and automated testing to keep it fast and error-free.

Systems Analysis & Business Process Capstone | Delta Air Lines – KRONOS | 01/2026 – 05/2026 | [View Case Study](#)

- Designed a passenger disruption-recovery decision-support system for Delta Air Lines, modeling rebooking, refunds, vouchers, and escalation workflows through UML diagrams, business process models, and user-centered dashboards.
- Conducted SWOT and business process analyses to identify operational recovery challenges and translate findings into functional system requirements.
- Created system documentation, including use case, activity, class, sequence, and state machine diagrams.

AWS Cloud Infrastructure & Web Server Deployment | Amazon Web Services (AWS) | [View Case Study](#)

- Designed and deployed a cloud-based web server environment using AWS services, including VPC, EC2, Internet Gateway, security groups, IAM, and CloudWatch.

SKILLS

- **Software & Web Development:** HTML5, CSS3, JavaScript, Bootstrap 5, Responsive Web Design, LLM-Assisted Application Development
- **Development & Cloud Tools:** Git & GitHub, Visual Studio Code, Vercel, Supabase, Linux Command Line
- **Systems & Analysis:** UML Diagrams, Requirements Gathering, Business Process Analysis, Microsoft Visio, Lucidchart, Bizagi, Microsoft Project
- **Data & Visualization:** SQL, Microsoft Excel, Tableau, Oracle Database, ArcGIS Pro, Network Analysis, Data Visualization
- **Enterprise & Technical Tools:** SAP, Wireshark, Figma, Microsoft PowerPoint
- **Programming:** Java, Python, C, and C++ through coursework and project experience
- **Additional Skills:** Technical Documentation, Debugging, User-Centered Design, Problem Solving
- **Languages:** English, Spanish

TRAINING AND CERTIFICATIONS

- CS50: Introduction to Computer Science (Harvard) (06/2024)
- Figma Essential Training - LinkedIn Learning (01/2025)
- Prompt Engineering with ChatGPT - LinkedIn Learning (01/2025)
- AWS Academy Graduate - Data Center Technician - Amazon Web Services (AWS) (05/2026)
- AWS Academy Graduate - Cloud Architecting - Amazon Web Services (AWS) (05/2026)
